

Privacy Policy

Project Management Platform

Last Updated: June 2026

Welcome to our Project Management Platform. We are committed to protecting your personal information and your right to privacy. This policy explains what information we collect based on your interactions with our service, how we use it, and what rights you have in relation to it.

1. Information We Collect

Based on our platform's architecture and features, we collect the following types of information when you register and use the service:

Data Category	Specific Data Points Collected	Purpose of Collection
Identity & Contact	Name, Surname, Email address (including OAuth data)	To create your account, uniquely identify you across projects, and facilitate secure login.
Security & Authentication	Password (hashed), API Keys, Authentication Cookies	To authenticate your account, secure your profile, maintain your session, and enable secure integrations.
Professional Profile & Uploads	Job Title, Job Organization, Location, and Profile Avatar	To personalize your workspace, provide contextual collaboration tools, and display accurate user identification.
User-Generated Content	Issue titles/descriptions, Project details	To provide the core project management functionality and facilitate team collaboration.
Activity & Usage	Account creation date, Issue assignments, Project membership	To maintain system access logs and assign work appropriately.

2. Cookies and OAuth

We use **Cookies** and **OAuth** to provide a seamless and secure login experience. Cookies are small data files stored on your device that help us maintain your active session and recognize you when you return. OAuth allows you to securely sign in using third-party providers without sharing your password with us.

3. How We Use Your Information

- **Authentication & Security:** Validating your session via cookies and OAuth tokens to keep your data secure.
- **To Provide and Maintain the Service:** Managing your user roles (Admin, Member, Viewer) and regulating access to specific project data.
- **Collaboration:** Displaying your profile (Name, Uploaded Avatar, Job Title) to other team members within the same projects.

4. Data Retention and Account Deletion

Please note that users cannot delete their accounts directly via a button in the user interface. We retain your personal data indefinitely to maintain historical project integrity and continuity within the platform. Your data will be kept securely unless you explicitly request its removal. If you wish to permanently remove your personal data and delete your account, you must contact the platform administrators directly. To initiate a data removal request, please contact us at **ekanaeva@student.42.fr**.
